Pragadee

Pragadeeshwari | 9489151987 | pragadee89@gmail.com | linkedin.com/in/pragadee0936

Education:

B-Tech (Computer Science and Engineering), SRM Institute of Science and Technology.

Skills:

- Languages: C, Python, Java, Go
- Web: HTML, CSS, JavaScript, React, Node.js
- Database: SQL, MongoDB
- Tools: Git, GitHub, VS Code
- Concepts: DSA, OOPs, OS, DBMS, CN
- Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

Projects:

- Built a *bi-directional sign language translation system* using computer vision and deep learning that converts sign gestures to text and text back to sign language in real time.
- Developed an ML model to *detect cybersecurity threats* by classifying network traffic patterns, achieving high accuracy using Python and Scikit-learn.
- Designed an *IoT system that monitors temperature in real time* and automatically controls fan speed using Arduino/Raspberry Pi and sensor data.
- Built a *secure API gateway* that uses Context-Free Grammar (CFG) parsing to validate incoming JSON and XML API requests, rejecting malformed or malicious payloads before they reach the backend server. Implemented custom grammar rules in Python to parse and validate request structures, integrated with a Node.js gateway layer to enforce schema compliance and improve API security.

Internships:

- **Java Programming Intern** — YHills Edutech June 2024 – July 2024 | Developed Java applications applying OOPs concepts such as inheritance, polymorphism, and exception handling. Worked on mini projects involving data structures and logic building using Core Java.
- **Web Development Intern** — CodeBind Technologies, Chennai December 2023 | Built responsive web pages using HTML, CSS, and JavaScript following standard UI/UX practices. Assisted in developing frontend components and integrating them with backend APIs.
- **Embedded Systems Intern** — CodeBind Technologies, Chennai July 2025 | Worked on embedded system modules using Arduino/Raspberry Pi and interfaced sensors for real-time data monitoring. Implemented basic control logic for hardware components in IoT-based environments.

Certifications and Achievements:

- **AWS Generative AI Badge** — Amazon Web Services
- **Google Data Analytics Certificate** — Coursera
- **Meta Full Stack Developer** — Coursera
- **IBM DevOps and Software Engineering** — Coursera
- **Foundations of Cybersecurity** — Coursera
- **AI Capstone Project with Deep Learning** — Coursera
- participated **PowerBI workshop** on powerBI organized by OfficeMaster, 2026
- Acted as a social media handler of **Neuro tech titans** club, SRMIST — involved in organizing technical events and activities, 2025.
- Attended Bootcamp on Full Stack Development organized by NoviTech R& D Private Limited, 2025.
